

# Morocco - Small-Scale Fisheries (Final)

Report generated on: May 26, 2020

Visit our data catalog at: <https://data.mcc.gov/evaluations/index.php>

# Overview

## Identification

### COUNTRY

Morocco

### EVALUATION TITLE

Small-Scale Fisheries (Final)

### EVALUATION TYPE

Independent Performance Evaluation

### ID NUMBER

DDI-MCC-MAR-IE-AG-2020-V1

## Version

### VERSION DESCRIPTION

Version 01

## Overview

### ABSTRACT

The Fish Landing Sites and Ports Facilities activity will include a time series analysis, a descriptive ex post analysis of quantitative outcomes such as fish catch and sales prices, a qualitative implementation study, and a port and fish landing site infrastructure assessment.

The Wholesale Fish Markets activity will include a quantitative outcomes analysis of outcomes related to fish sales and consumption as well as a separate qualitative implementation study to examine how the fish value chain and household fish consumption have changed in market cities.

The MPA sub-activity will include a qualitative implementation study that includes a descriptive analysis of existing data on marine health to report on the implementation and perceive outcomes of this sub-activity.

### EVALUATION METHODOLOGY

Ex-Post

### UNITS OF ANALYSIS

Individuals, community, administrative units, other

### KIND OF DATA

Sample survey data [ssd]

### TOPICS

Topic	Vocabulary	URI
Agriculture and irrigation	MCC Sector	

### KEYWORDS

Morocco, Morocco Compact, small scale fisheries, fish landing site, wholesale fish market, marine protected area

## Coverage

### GEOGRAPHIC COVERAGE

Coastal cities, major cities

**UNIVERSE**

Small-scale fishers, fish landing site and port staff members, wholesale market customer, vendors, senior officials and implementing partners, value-chain actors, Government of Morocco, MCC and other stakeholders

## Producers and Sponsors

Mathematica			Independent Evaluator

**DATE OF METADATA PRODUCTION**

2020-03-26

**DDI DOCUMENT VERSION**

Version 1 (Original 2020-03-26)

**DDI DOCUMENT ID**

DDI-MCC-MAR-IE-AG-2020-V1

## MCC Compact and Program

---

**COMPACT OR THRESHOLD**

Morocco Compact

**PROGRAM**

MCC partnered with GoM to implement the Morocco Compact from 2007 to 2013 in order to modernize industrial sectors and target areas in which the country had competitive advantages, such as textiles, agribusiness, fishing, and handicrafts. The compact, which entered into force on September 15, 2008, comprised five projects: (1) the Fruit Tree Productivity Project; (2) the Small Scale Fisheries Project; (3) the Artisan and Fez Medina Project; (4) the Enterprise Support Project; and (5) the Financial Services Project. Mathematica is designing and conducting an ex-post evaluation of the Small Scale Fisheries Project. The Small Scale Fisheries Project aimed to improve the quality of fish moving through domestic channels and assure the sustainable use of fishing resources through three activities: (1) the Wholesale Fish Markets Activity, which build five wholesale markets in major cities; (2) the Fish Landing Sites and Port Facilities Activity, which upgraded facilities in 10 major existing ports and constructure 11 new fish landing sites equipped with essential services for small-scale fishers; and (3) the Mobile Fish Vendors Activity, which partially funded fresh-fish transportation equipment for mobile fish vendors. Mathematica will evaluate the first two activities and one sub-activity included in the Fish Landing Sites Sites and Port Facilities Activity, which established three new marine-protected areas.

**MCC SECTOR**

Agriculture and Irrigation (Ag & Irr)

**PROGRAM LOGIC**

The activities planned under the project are designed to contribute, individually or in combination, to increased economic growth and reduced poverty through (1) increased fish consumption in project cities, (2) increased revenue and profitability for fishers, and (3) reduced poverty levels among small fishers.

**PROGRAM PARTICIPANTS**

The Small Scale Fisheries project worked with small-scale fishers and staff at ports and fish landing sites and wholesale market vendors.

# Sampling

## Study Population

---

Small-scale fishers, fish landing site and port staff members, wholesale market customer, vendors, senior officials and implementing partners, value-chain actors, Government of Morocco, MCC and other stakeholders

## Sampling Procedure

---

Not applicable, as this report outlines the sample design

## Deviations from Sample Design

---

Not applicable, as this report outlines the sample design

## Response Rate

---

Not applicable, as this report outlines the sample design

## Weighting

---

Not applicable, as this report outlines the sample design

# Questionnaires

## Overview

---

We will conduct in-person surveys with fishers at project fish landing sites and ports.

## Data Collection

### Data Collection Notes

---

None, as we have not yet collected data

### Questionnaires

---

We will conduct in-person surveys with fishers at project fish landing sites and ports.

### Data Collectors

---

Name	Abbreviation	Affiliation
Chezeen Business		
C&O Marketing		

### Supervision

---

N/A, as we have not yet collected the data

## Data Processing

### Data Editing

---

N/A, as we have not yet collected the data

### Other Processing

---

N/A, as we have not yet collected the data

## **Data Appraisal**

### Estimates of Sampling Error

Not applicable, as this report outlines the sample design
